

Data Dictionary – Public Transport Delay Analysis

Dataset Name: clean_transport_data.csv
Purpose: Business Intelligence dashboard for analyzing public transportation delays and performance.
Time Period: January 1–9, 2023

Field Descriptions

Column Name	Data Type	Description
trip_id	String	Unique identifier for each trip
date	Date	Date of the trip
time	Time	Scheduled start time
transport_type	String	Type of transport (Bus, Tram, Metro, Train)
route_id	String	Route identifier
origin_station	String	Starting station
destination_station	String	Ending station
scheduled_arrival	Time	Planned arrival time
actual_arrival_delay_min	Integer	Arrival delay in minutes
trip_status	String	Trip status (Completed or Cancelled)
delayed_5min	Binary (0/1)	Indicates delay greater than 5 minutes
on_time	Binary (0/1)	Indicates on-time arrival
peak_hour	Binary (0/1)	Indicates peak hour period
hour	Integer	Hour of day (0–23)
weekday	Integer	Day of week (Monday = 0)

Notes

- Delay values may be negative, indicating early arrivals.
- Peak hours are predefined time periods used for analysis.
- The dataset has been cleaned and prepared for BI analysis.
